

Project 7 – Composite Photo

NAME: _____

Assignment:

You will watch the video on my website (woodmathroom.weebly.com). This video is not step-by-step for how you need to do your project. But it will show you essential tools used in making your composite photo. You will need to find two photographs that you can make a composite out of. These photos will be cut out and placed on a gradient background. The two photos need to fit together to achieve an overall theme. You will also need to include the two original photos to in the final composition with the same drop shadow effect applied to both.

Grading Rubric

(15 Points Total)

Categories	1 point Needs improvement	2 points Meets Expectation	3 points Exceeds Expectations	Points
<p>Image is Properly Named and Saved Image should be named Project 7 – Composite Photo, and saved as a .jpg</p>
